Subject: RheoTune Software release notes V2.6.0.0

Dear RheoTune user,

This release contains the latest version of the RheoTune software (V2.6.0.0), including updates of RheoLog, RheoEdit and RheoCal. To be able to use this software you must be part of our maintenance program. If you would like to have information about this maintenance program you can contact our sales department (sales@stema-systems.nl).

Every RheoTune will have a dedicated installation. If you want to have an installer that contains the calibration files of your tune, contact Stema Systems on support@stema-systems.nl. If you have changed your calibration files, make sure to have a back-up before the installation is executed.

The main new developments of this release are:
- Several bug fixes
- General improvements of user interface
- Position input via UDP (RheoLog)
- Position string added (RheoLog)
- Possible to control speed at which the RheoTune is raised (RheoLog)
- Change color of Density, Yield Stress and Viscosity profiles (RheoEdit)
- Copy charts to clipboard (RheoEdit and RheoCal)
- Updated manuals
- Manual and calibration certificate included in the software

If you have any questions, feedback or inquiries for developments to be made, please inform us for we would gladly take this into account for our next release.

Liesbeth Verweij
Stema Systems
